Microsoft IIS webserver

- Start the application named: IIS Manager.
- Select your website
- On the right part of the screen, access the option named: HTTP Response Headers.
- On the top right part of the screen, click on the Add option.
- To enable the X-Content-Type-Options header, enter the following configuration:
  - NAME: X-Content-Type-Options
  - VALUE: nosniff

Click on the OK button.
